

**OVERVIEW**

Alabama is an emerging hub for the information technology industry. Access to talent, partnerships with higher education, low costs of living and doing business create a rich ecosystem for the industry. Alabama is home to numerous nationally known companies with major IT operations. Robust defense, finance/insurance and healthcare industries were the genesis of many of these companies.

**HIGHLIGHTS**

- Alabama offers several regions for IT talent and industry, including the metro areas of Auburn-Opelika, Birmingham, Huntsville, Mobile, Montgomery, and Tuscaloosa.
- Alabama's first Internet Exchange is located in Montgomery—one of only four in the Southeast.
- Throughout Alabama are concentrations of large and small, new and well-established companies offering software development and computer system design services among other IT products and services.

Across Alabama, IT exists not only as a support system but as a major stand alone sector of the state's economy.

Employing approximately 15,000, Alabama's IT companies generate over \$1 billion in annual revenue and serve such distinct industries as banking and finance, government, education, consumer products, GIS, and utilities automation.

In 2015, Equifax located an IT talent center at Auburn University to prepare students for high-tech jobs that support a global economy.

Hoover's home to the National Computer Forensics Institute (NCFI), a federally funded training center dedicated to instructing state and local officials in digital evidence and cybercrime investigations.

Rural Sourcing, an IT outsourcing company, located its third software development center in Mobile, Alabama.

Google located a \$600 million data center in Jackson County, Alabama. It is the internet company's 14<sup>th</sup> global location.

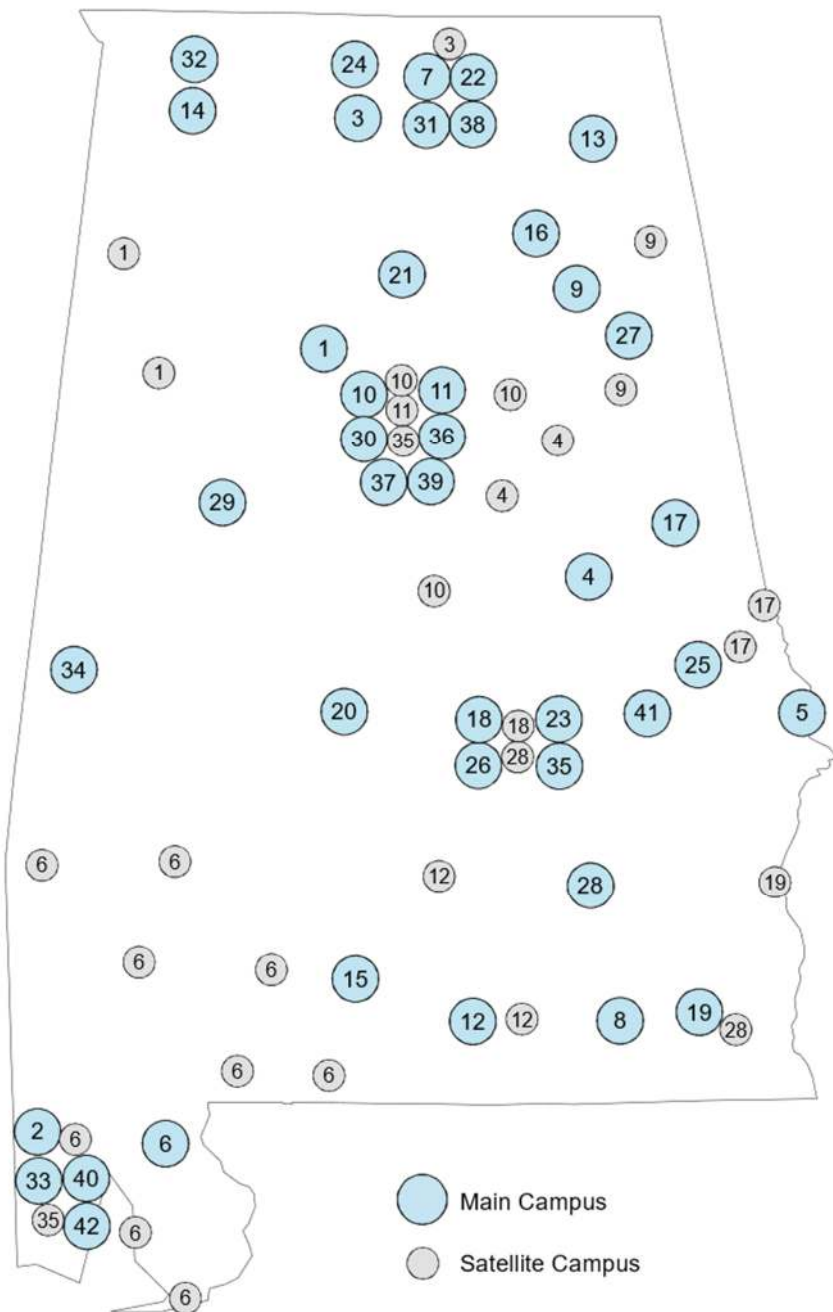

## TALENT PRODUCER— GREAT UNIVERSITIES AND COLLEGES

Alabama's higher education system offers new and expanding companies access to excellent workforce training, state-of-the-art technology and innovation at the state's leading engineering, and research schools.

13 Public Four-Year Institutions and 21 Public Two-Year Institutions Offering IT Degrees.
